Locking Cable Solution Options

Prevent your devices' cables from accidentally unplugging. Even when inserted correctly into the cabinet power distribution unit (CDU), device power cables can become dislodged due to user error or vibration over time. Server Technology offers multiple solutions that data center managers can deploy to firmly secure power cables to the outlets on a CDU to provide peace of mind.
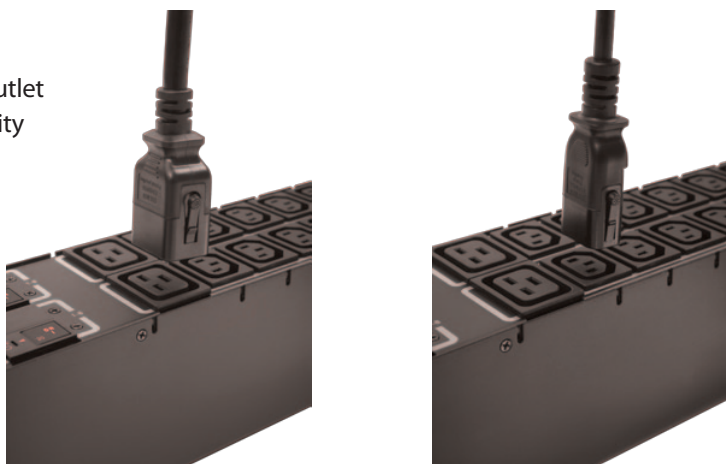

Cable Retention Clip:
> Easily attaches to the side of vertical Sentry CDUs.
> Works on C14 or C20 plugs with straight cord angles.
> Supplied with all Server Technology products that contain C13 and C19 outlets.

Locking Cable:

> Special cable that locks into designated locking outlet (consult a Server Tech sales rep regarding availability of locking outlets on specific CDUs.)
> Audible click to ensure cable is secure.
> Available for C14 and C20 plugs

Plug Sleeve :

> Thin plastic sleeve for a more snug fit of the plug when inserted into the outlet
> Available for C14 plugs
